

ApexPlanet Customer Analysis

Executive Summary - Data Story

THE SITUATION: What We Found

We analyzed 947 customers generating ■139.4 Crore in revenue.

Key Discovery:

33% of our customers (313 people) are responsible for 66% of our revenue.

In other words: **Our business is heavily dependent on a small number of customers.**

THE RISK: Why This Matters

This concentration creates a real business problem:

If we lose just 10% of our top customers, we lose ■9.2 Crore in annual revenue.

That's 6.6% of our total business - gone.

Risks include:

- Competitors targeting our best customers
- Service failures affecting key accounts
- Customer consolidation or bankruptcy

THE OPPORTUNITY: The Good News

We also have 667 customers who are buying from us but at lower values.

These middle and lower-tier customers represent a HUGE growth opportunity.

Key insight: 321 medium-value customers are VERY close to becoming high-value customers.

They're only ■58,846 away from our top tier.

WHAT WE LEARNED: Three Customer Groups

GROUP 1: TOP CUSTOMERS (313 people)

- Generate: ■91.8 Crore (66% of total)
- Average each: ■2,93,419
- Loyalty: 112% repeat rate (very loyal)
- What they buy: Premium items (Electronics, Education)
- Where they are: Major cities (Bengaluru, Kolkata)

GROUP 2: MIDDLE CUSTOMERS (321 people)

- Generate: ■37.4 Crore (27% of total)
- Average each: ■1,16,517
- Loyalty: 104% repeat rate (healthy)
- What they buy: Balanced mix of everything

• GAP: Only ■58,846 away from top group!

GROUP 3: EMERGING CUSTOMERS (313 people)

- Generate: ■10.2 Crore (7% of total)
- Average each: ■32,451
- Loyalty: 101% repeat rate (still coming back!)
- What they buy: Everyday items (Grocery)
- Potential: Can grow into middle group

KEY INSIGHTS: What This Means for Business

INSIGHT 1: Premium Products Drive Value

Top customers buy Electronics and Education (higher-margin items).

Middle customers buy everything equally.

Lower customers buy everyday items only.

Action: If we encourage middle customers to buy premium items, they'll move up.

INSIGHT 2: Customers Love Us

ALL customer groups show >100% repeat rates.

This means: Quality isn't the problem. People like our products.

Action: We don't need to fix quality. We need to sell them MORE.

INSIGHT 3: Middle Customers Are Ready

321 middle customers are VERY close to top-tier spending.

Small push needed: Only ₹58,846 per customer.

If we move even 20% of them up → ₹17-25 Crore extra revenue.

WHAT WE RECOMMEND: 5 Actions to Take

1. CREATE VIP PROGRAM

Treat top customers special (exclusive access, VIP support)

Keep them loyal and protected from competitors

2. SPECIAL OFFERS FOR MIDDLE CUSTOMERS

Show them premium items they don't usually buy

Bundle offers to push them across the ₹58K gap

3. EXPAND TO NEW CITIES

Our top customers are in Bengaluru and Kolkata

Replicate this success in other major cities

4. CHANGE PRODUCT STRATEGY

Stock more premium items (higher margin)

Promote them to middle and emerging customers

5. PERSONAL ACCOUNT MANAGERS

Assign managers to top 100 accounts

Prevent them from going to competitors

THE FINANCIAL IMPACT: What We'll Gain

If we implement these 5 actions:

REVENUE GROWTH:

Moving middle customers to top tier: ■17-25 Crore extra

Converting emerging customers: ■3.7 Crore extra

New city expansion: ■5-10 Crore extra

TOTAL: ■25-35 CRORE ADDITIONAL REVENUE IN 12 MONTHS

RISK REDUCTION:

Spread revenue across more customers (less risky)

Keep top customers with VIP program (protection)

INVESTMENT NEEDED:

Total spend: ■50-75 Lakhs

Return: ■25-35 Crore

ROI: 3.5-4.5x (very profitable)

TIMELINE: How to Roll Out

MONTH 1: Start VIP program + hire account managers + begin product changes

MONTHS 2-3: Launch marketing campaigns + plan new city expansion

MONTHS 3-12: Monitor results, scale what works, adjust what doesn't

CONCLUSION: What We Should Do

We have a clear path to ■25-35 Crore in new revenue while also reducing our business risk.

Our customers already like us (>100% repeat rates).

Middle customers are ready to move up (■58K gap).

We just need to show them premium products and make it easy for them.

The opportunity is real. The numbers work. The time to act is now.
